

# **Compliance Monitoring** Report

**Consent Holder** 

Ravensdown Fertiliser Co-

operative Limited

**Consent No** DP040143W

**Client Address** 

Private Bag 6012

Site Address 808 Waitangi Road, Awatoto

Hawke's Bay Mail Centre

NAPIER 4142

**Phone** 

(06) 834 1760

**Contact Name** 

**Kevin Gettins** 

Mobile

021 900 292

**Job Code** 

456-06

**Consent Type** 

Discharge Permit

#### **Activity Description:**

to discharge contaminants into water for the purpose of disposing of stormwater, cooling water from air compressors and a hydraulic drive, water from drinking fountains and a truck wash, water from cooling towers and high pressure boilers, and rinse water from a boiler water treatment plant into the Tutaekuri River (Waitangi Estuary).

### 2010-2011 Statement of Compliance and Overall Grades:

**Grade Date** 

01-Dec-10

**Environmental Grade** 

Compliance

**Technical Grade** 

Compliance

#### **Overall Comments:**

To date, full compliance with the conditions has been achieved.

## **Previous Statement of Compliance and Overall Grades:**

**Grade Date** 

30-Nov-10

**Environmental Grade** 

Non Compliance

**Technical Grade** 

Compliance

#### Overall Comments:

This report was prepared from monitoring data supplied by the consent holder for the 2009-2010 year. There was no site visit. The non-compliance relates to one low pH result for the year.

Refer to back page for grading information

Condition No.	Type of Condition	Consent Condition and Compliance Assessment
1	Technical	All works and structures relating to this resource consent shall be designed and constructed to conform to the best engineering practices and at all times maintained to a safe and serviceable standard.
	Compliance	30-Nov-10
	Compliance	01-Dec-10
		Observed to be the case.
2	Technical	The consent holder shall undertake all operations in accordance with any drawings, specifications, statements of intent and other information supplied

# **Technical**

5

compliance with these requirements. Compliance for the whole season will be assessed after June 2011.

The consent holder shall carry out the following monitoring programme at the consent holders expense:

- a) A sampling station shall be maintained at the outlet of the settlement pond and be accessible to the Council officers, or its agents at all times.
- b) A representative, flow-proportional, composite sample (sampled continuously over a period of 24 hours) shall be collected from the sampling station, referred to in Condition 5a, at least once per week and tested for the following parameters:
- i) pH:
- ii) total phosphorus;
- iii) soluble reactive phosphorus;
- iv) fluoride;
- v) suspended solids

Results shall be recorded on a mass per unit volume of discharge basis and the volume of discharge shall also be recorded. The records shall be forwarded to the Council at monthly intervals, along with an assessment of compliance against condition 4.

- c) A representative, flow-proportional, composite sample (sampled continuously over a period of one week) shall be collected from the sampling station, referred to in Condition 5a, at six monthly intervals and tested for the following parameters:
- i) total copper
- ii) total zinc
- iii) total cadmium
- iv) total chrome
- v) total aluminium
- vi) total sulphur

Results shall be taken on a mass per unit volume of discharge basis and the volume of discharge taken shall also be recorded. The records shall be forwarded to the Council at six monthly intervals.

d) All sampling and surveys shall be carried out by a person suitably qualified

Total Copper□□

2 mg/kg (screen)□□

Condition
No.

# Type of Condition

# **Consent Condition and Compliance Assessment**

Total Cadmium □ □
0.1 mg/kg (screen)□□
Total Chromium □ □
2 mg/kg (screen)□□
Total Zinc□□
4 mg/kg (screen)□□
Total Mercury□□
0.1 mg/kg (screen)□□
Total Nickel □ □
2 mg/kg (screen)□□
c) receiving water quality to determine whether contaminants of concern are present and in what concentrations.
Receiving water should be analysed for:
- Temperature
- Salinity
- Dissolved oxygen
- pH <sup>™</sup>
- Susended Solids
- Chlorophyll a
- Ammoniacal Nitrogen
- Nitrate Nitrogen
- Nitrite Nitrogen
- Nitrate + Nitrite Nitrogen
- Total Nitrogen

0.00008 mg/l (trace)□□	
Nickel□□	

0.0005 mg/l (trace)□□

Condition
No.

#### Type of Condition

#### **Consent Condition and Compliance Assessment**

- d) chlorophyll a concentrations as an indicator of potential nutrient enrichment.
- e) presence/absence of fish species.
- f) periphyton biomass and taxonomy as an indicator of potential nutrient enrichment.
- g) undertake Whole Effluent Toxicity Testing to determine the effects of the combined discharge on organisms in the receiving environment on three test species at 100: 1 dilution.

Not applicable

30-Nov-10

Next monitoring due June 2011

Not applicable

01-Dec-10

#### Next monitoring due June 2011

7 Technical

The consent holder shall submit a monitoring program, designed to meet the requirements of Condition 6, to the satisfaction of the Council (Manager: Environmental Regulation), prior to the receiving environment monitoring occurring in accordance with Condition 7.

Not applicable

30-Nov-10

Next monitoring due June 2011

Not applicable

01-Dec-10

#### Next monitoring due June 2011

8 Technical

Within three months of the receiving environment monitoring taking place in accordance with Condition 7, the consent holder shall submit a report to the Hawke's Bay Regional Council detailing results and analysis of the monitoring, and a summary of conclusions.

Not applicable

30-Nov-10

Next monitoring due June 2011

Not applicable

01-Dec-10

#### Next monitoring due June 2011

9 Technical

The consent holder shall prepare an annual report for the period of July to June each year, and by the end of July and submit it to the Hawke's Bay Regional Council. The report shall summarise monitoring and compliance to the consent conditions and discuss any non-compliance and recommended necessary actions to achieve compliance.

Compliance

30-Nov-10

Council received this report 1/11/10

Not applicable

01-Dec-10

The next annual report is due after June 2011 for this whole season.

#### **Grading Information**

Each consent condition has been classified as either a Environmental or Technical condition.

#### **Environmental conditions:**

Environmental conditions set standards/performance limits for a resource consent, or, mitigates an environmental impact of exercising a resource consent.

Examples of environmental conditions are:

- Installation of up-gradient cut-off drains/ placement of disposal fields
- □volume limits of discharges
- Dwater take rates and maximum volumes
- Idischarge or receiving water contaminant limits

## **Technical conditions:**

Technical conditions sets out technical requirements that allows a consent holder to demonstrate or measure that they meet the Environmental performance required by a resource consent, or help specify the activity authorised.

Examples of technical conditions are:

- Dsampling effluent/ recording discharge volumes / collating submitting data
- providing of reports/ plans/ designs specifications
- Unotifications, accreditation, authorities submissions for approval by ER Manager
- Dinstallation and maintenance of a water meter

You need to comply with all conditions regardless of whether it's a Environmental or Technical condition.
